FOREWORD

For more than 15 years, BATS Consulting has stood by a strong belief: every business deserves to grow on a foundation of clarity, confidence, and sustainability. In an environment where regulations are increasingly complex and sustainability demands are rising, we are here to help organizations transform challenges into opportunities.

We believe the true value of a consultant lies not only in advice, but in the ability to **cut through complexity, provide confidence in compliance, and deliver measurable impact for long-term growth**. By integrating expertise across business, finance, tax, and ESG, we create approaches that instill confidence before regulators, generate integrated insights across disciplines, and deliver results that truly matter.

Our guiding principle, *Cut Complexity for Sustainable Future*, reflects our commitment to accompany clients in building a future that is clear, competitive, and sustainable. This principle lives at the heart of every decision, methodology, and collaboration we undertake.

Through close collaboration with business leaders, regulators, and investors, we ensure that every step not only meets compliance, but also unlocks access to green financing, enhances efficiency, and strengthens sustainability narratives that inspire trust in the market.

With a spirit of collaboration, integrity, and innovation, BATS Consulting is ready to stand beside you—helping you make bolder, smarter, and more valuable decisions. Together, we build not only resilient businesses, but also a sustainable future.

TABLE OF CONTENT

At BATS Consulting, we take pride in being a **trusted strategic partner for businesses** seeking excellence in corporate consulting, sustainability, and regulatory compliance. Our extensive expertise, combined with a deep understanding of market dynamics, enables us to deliver tailored solutions that drive business growth and operational efficiency.

VISION

To be Indonesia's most trusted partner for businesses building a sustainable future

ROOTED IN INDONESIA. BUILT TO GLOBAL STANDARDS.

MISSION

**CUT COMPLEXITY INTO DECISIONS
OUR CLIENTS CAN DEFEND**

- Deliver services of international standard to clients at home and abroad
- Earn trust through consistency, integrity, and technical rigour in every engagement
- Strengthen Indonesian business through knowledge, capability, and shared standards
- Turn regulatory and sustainability complexity into clear, measurable outcomes

WHY US?

We are not solely focused on the past, but also on the future trajectory of your business. While growth and innovation are vital, developing a holistic perspective can be challenging, particularly when you are occupied with daily operations and consistent business performance. Achieving a comprehensive outlook requires exceptional ideas, strategic planning, and the flawless execution of initiatives. At BATS, we adopt a multidimensional approach to scrutinize challenges, enabling us to deliver unique, efficient, and effective solutions to the business environment, unlocking a future brimming with limitless opportunities.

We recognize that the business landscape is constantly evolving, influenced by a wide range of internal and external factors, including employees, management, regulators, vendors, customers, competitors, and societal shifts. Therefore, the need for continuous learning, conducting research, and fostering innovation is paramount.

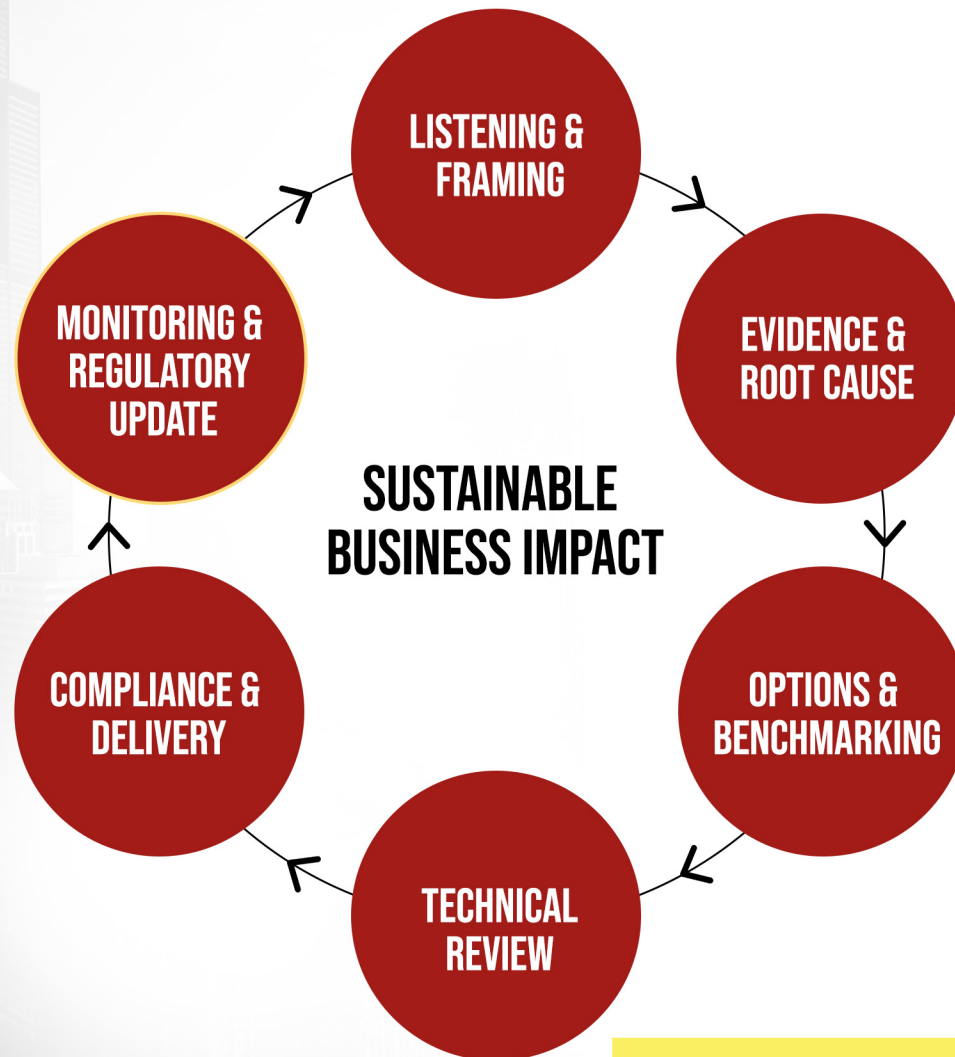

With over 15 years of experience in business consulting, specializing in accounting, taxation, audit, legal, and human resources, we are well-equipped to meet your expectations. Furthermore, we are experts in sustainability and carbon projects, offering comprehensive services that help businesses achieve their sustainability objectives through GHG emission assessments, carbon credit strategies, and sustainable development plans.

Our commitment to sustainability consulting ensures that your business not only adheres to regulations but also creates enduring value, positioning us as a trusted partner in your journey toward a sustainable and carbon-neutral future.

HOW WE WORK

Every engagement moves through six stages. Each stage ends with something in your hands — not just a status update.

1. SCOPE — LISTENING & FRAMING

We start by understanding your context, constraints, and what success actually looks like for you. Together we agree on boundaries, timeline, and who does what.
You receive: Engagement charter and preliminary risk map.

2. DIAGNOSE — EVIDENCE & ROOT CAUSE

We examine the facts — documents, data, systems, and regulatory position — to separate symptoms from causes and identify where exposure actually sits.
You receive: Diagnostic report and gap analysis against applicable regulations.

3. DESIGN — OPTIONS & BENCHMARKING

We develop practical options, benchmark them against industry practice, and set out the trade-offs so the decision remains yours.
You receive: Options paper with cost-benefit analysis and regulatory basis.

4. VALIDATE — TECHNICAL REVIEW

Every recommendation is tested against evidence, current regulation, and a second partner review before it reaches you.
You receive: Validation memo and partner-level sign-off.

5. EXECUTE — COMPLIANCE & DELIVERY

We turn the decision into action — filings, documentation, system changes, and implementation — with compliance built in rather than checked afterwards.
You receive: Implementation plan, completed deliverables, and filing records.

6. SUSTAIN — MONITORING & REGULATORY UPDATE

Regulations move. We monitor what changes, flag what affects you, and adjust the approach so today's solution still holds next year.
You receive: Monitoring dashboard and periodic regulatory updates.

One team, four disciplines.

Accounting, taxation, legal, and sustainability sit under one roof at BATS — so your tax position, financial reporting, and ESG disclosure are reviewed against each other, not in isolation. That is how we cut through complexity into decisions you can defend before regulators, investors, and your board.
